Project Name	Freelancing (SB Works)
Maximum Marks	2 Marks

Proposed Solution for Freelancing (SB Works):

S. No.	Parameter	Description
1	**Problem Statement**	Freelancers and clients struggle with inefficient collaboration, lack of trust, delayed communication, and no unified platform to manage the workflow.
2	**Idea / Solution Description**	A full-stack MERN (MongoDB, Express, React, Node.js) web app where clients can post projects and freelancers can apply. Includes dashboards, live chat, and role-based access.
3	**Novelty / Uniqueness**	- Built-in messaging system using Socket.io- Clean dashboards for both users- Real-time job browsing and filtered project listings- Admin panel for dispute handling
4	**Social Impact / Customer Satisfaction**	- Enables remote income for freelancers- Simplifies hiring for startups and businesses- Builds trust with integrated messaging and profiles- Transparent and fair platform design
5	**Business Model**	- Commission-based (per project)- Free account access with optional premium features (e.g., project boosting)- Employer packages for bulk project posting
6	**Scalability of the Solution**	- Expandable with mobile app (React Native)- Global-ready (multi-language/currency support)- Modular code for integrating features like payments, video calling, or AI matchmaking
